OBJECTIVE ➤ To have fun creating content and applications for the web.

EXPERIENCE ➤ **Web Developer**

📍 Sprankle Technologies

📅 June 2010 - Present

Design layouts, interactions, and themes for digital content.

Develop web sites in accordance to design specs using HTML5, CSS3, and JavaScript. Sites are compatible with IE7+, incorporate appropriate pollyfills, and maintain search engine friendliness.

Program using frameworks including Symfony, Doctrine, Zend, Laravel, Wordpress, and other content management systems.

Digital Developer

📍 McConnell Marketing

📅 August 2012 - March 2013

Introduced HTML5 best practices, and dynamic site creation using PHP frameworks Laravel and Symfony to the firm.

Developed custom newsletters accordance to designs for high-end luxury hotels for use in Mail Chimp and Vertical Response.

Configured hosting environments for CentOS, Fedora, and IIS7 servers.

Web Developer

📍 Youngstown State University

📅 June 2010 - May 2012

Created the new university home page to provide rich content, maintaining IE7 comparability, and a basic level of accessibility.

Other responsibilities included the creation of templates for the university's content management system, trained staff for use of their CMS, and customized the ysunews.com WordPress site.

EDUCATION ➤ **Computer Information Systems**
